Custom Track Options

Tandem Alternative

Tandem alternative RTS motorized systems utilize two drapery motors and are for draperies that exceed the maximum single motor capacity. Tandem systems are also available with Dry Contact control technologies and require additional accessories.

See pages 24 & 25 for track configurations and specification details

Top Mount

Drapery motors can be installed above the drapery track depending on the project needs. This option provides the ability to conceal the motor in a drop ceiling or under a valance and requires an additional kit.

BENT DRAPERY TRACK MEASUREMENT FORM

1. Choose the design that best fits your room setup.
2. Measure the wall and degrees of all angles as in the examples shown below.
 - Make sure to provide the return measurement "R" (distance from wall to front of drapery track as shown in red). The bent track measurement form represents wall measurements; therefore, the "R" dimension **MUST BE** specified for accurate track fabrication. If "R" dimension **IS NOT** specified, drapery track will be fabricated according to dimensions (A, B, C, D, etc.) provided.
 - Return dimensions will not be considered, and measurements will be calculated from center of each bend.
 - When fabricating drapery, please add an additional 1.5 inches of drapery fabric to the anticipated return size.
3. Provide all measurements by filling out order form and submitting to Somfy.
