Select aluminum products only.  
See pricing for individual products.

## POWDER COAT FINISHES\*

**Powder Coat White (XW)**

**Powder Coat Cream (XH)**

**Powder Coat Bronze (XU)**

**Powder Coat Walnut (XI)**

**Powder Coat Black (XB)**

\*Powder Coat finishes only available on metal products. Indicated by LUX\* on that product.

**Hand Finishing Variations** — Drapery hardware that is finished individually in the hands of master craftsmen will naturally vary. It's inherent in the process, and the fact that it is not being replicated on a high-speed assembly line, is what makes it a custom drapery hardware product. Different materials take paint or stain differently. A hand-finished resin drapery rod finial may look slightly darker or lighter than a hand-finished wood drapery rod in the same color. This is because the wood absorbs more color than the resin. These slight natural color variations deliver the desired custom character and blend with the surroundings once the overall window treatment is installed.

**Brand Variations** — You may see the same color or finish name in other manufacturers' collections, however they may not match one another. For example, ADR's Oil-Rubbed Bronze may not match Oil-Rubbed Bronze from a different brand. Once you settle on which products you want to buy, it's a good idea to order all the components from the same vendor.

**Display Variations** — There may be variations between what you see in the catalog and the actual finish. To help ensure you get exactly what you want, we offer individual samples and complete sets of the ADR Color Palette in either key chain or binder formats. See pg. 3 or [artisandraperyrod.com/sales-resources/](http://artisandraperyrod.com/sales-resources/)

# FRENCH Rods

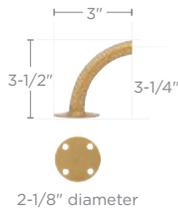

French Rods are known for their simplicity and clean casual lines. They're perfect for pleated, grommet, tab-top, and rod-pocket style drapery treatments. Their sleek inward curves allow panels to wrap around the pole and stack back against the wall. This achieves a clean, polished look with full fabric closure on both ends which adds privacy, reduces noise, drafts, and limits sidelight.

# 1 INCH Scale

One Inch Scale items are the largest part of the ADR product line. This includes 5/8 in., 7/8 in., 3/4 in., and 1 in. diameter rods. One Inch Scale finials, brackets and rings relate properly to these four rod sizes in form, proportion, and function. Of course, everything is always relative to the scope of the room, the amount of space to be occupied, the weight to be supported, and the statement to be made with the design.

## RODS OVER 12 FT. IN LENGTH (8' BAMBOO)

Longer rods are made from two or more sections of raw material (wood, metal, bamboo, etc.), spliced together structurally and finished to look and function as one continuous rod. The splice usually occurs at the center and should be supported with a bracket. We recommend a support bracket every 4 to 6 feet (depending on the weight of the drapes) and under each point at which rods are joined with a connector.

### TIPS FOR SAVING ON SHIPPING FEES

Buy smaller rods 104" or less and join them onsite using a connector, especially when using center draw and/or stationary panels. A support bracket will be needed where you join the rod. Other support brackets may be needed as well depending on the length of the rod and the weight of the drapes.

### RTS ONLY MOTORS - SINGLE ROOM

- Up to 5 motors in a single room
- Motor design and advanced high performance belt drive system provides quiet operation.
- RTS stands for Radio Technology Somfy® and is Somfy's exclusive control platform enabling users to adjust motorized interior window coverings
- Control motorized products from up to 20 feet—or 65 feet in ideal conditions—without needing to aim the remote. Its omnidirectional signal works through walls, just like a garage door opener.

# 2 INCH Scale

Two Inch Scale drapery hardware includes 1- $\frac{3}{4}$  inch and 2 inch diameter rods. Two Inch Scale finials, brackets, and rings relate properly to these rod sizes in form, proportion, and function. Of course, everything is always relative to the size of the room, the amount of space to be occupied, the weight to be supported, and the statement to be made with the design.

**RODS OVER 12 FT. IN LENGTH (8' BAMBOO)**

Longer rods are made from two or more sections of raw material (wood, metal, bamboo, etc.), spliced together structurally and finished to look and function as one continuous rod. The splice usually occurs at the center and should be supported with a bracket. We recommend a support bracket every 4 to 6 feet (depending on the weight of the drapes) and under each point at which rods are joined with a connector.

**TIPS FOR SAVING ON SHIPPING FEES**

Buy smaller rods 104" or less and join them onsite using a connector, especially when using center draw and/or stationary panels. A support bracket will be needed where you join the rod. Other support brackets may be needed as well depending on the length of the rod and the weight of the drapes.

**SHIPPING RODS OVER 92" IN LENGTH**

Rod Length	Ground Shipping
Rods and cornices over 92" up to 104" • In addition to regular ground shipping charges, each package will incur an additional Ground Overlength Surcharge	\$70-\$90

# ACRYLIC Collection

With the Acrylic Collection, you can create a window treatment that looks as luxurious as glass without the added weight and fragility. To pair with these iconic rods, we offer polished aluminum hardware in addition to accessories that can be created in any of our finishes.

# ACRYLIC COLLECTION

- Select the appropriate product for the length range you want, then specify the specific length for manufacturing purposes
- Fall-Off (left over piece) will not be shipped
- Acrylic rods can be connected together using any of the 1 3/8" brackets at the splice
- Rods are not drilled for finials. All finials are held on with a set screw
- Acrylic rods require a bracket every three to four linear feet depending on drapery weight
- Please provide the length you desire in inches after the product sku.
- **These finials can only be used with the Acrylic rod**

**1-3/8 in. Acrylic Rod**  
Finial, bracket, and rings sold separately

# 3 INCH Scale

Three Inch Scale drapery hardware includes 3 inch diameter rods. Three Inch Scale finials and brackets relate properly to these rod sizes in form, proportion, and function. Four inch rings are used with 3 inch diameter rods. Of course, everything is always relative to the size of the room, the amount of space to be occupied, the weight to be supported, and the statement to be made with the design.

**RODS OVER 12 FT. IN LENGTH (8' BAMBOO)**

Longer rods are made from two or more sections of raw material (wood, metal, bamboo, etc.), spliced together structurally and finished to look and function as one continuous rod. The splice usually occurs at the center and should be supported with a bracket. We recommend a support bracket every 4 to 6 feet (depending on the weight of the drapes) and under each point at which rods are joined with a connector.

**TIPS FOR SAVING ON SHIPPING FEES**

Buy smaller rods 104" or less and join them onsite using a connector, especially when using center draw and/or stationary panels. A support bracket will be needed where you join the rod. Other support brackets may be needed as well depending on the length of the rod and the weight of the drapes.

**SHIPPING RODS OVER 92" IN LENGTH**

Rod Length	Ground Shipping
Rods and cornices over 92" up to 104"	\$70-\$90
• In addition to regular ground shipping charges, each package will incur an additional Ground Overlength Surcharge	
Rod Length	Freight Shipping
Over 104" up to & including 140"	\$595
• Signature Required	
Residential Surcharge	\$200
Over 140" up to & including 176"	Call for a Quote required.

**CARE INSTRUCTIONS  
POLISHED ALUMINUM**

Aluminum is a soft metal that scratches easily. Please take care with installation of this hardware. Our Polished Aluminum is not coated with paint or lacquers. Use a soft metal polish (such as Mothers® Mag & Aluminum Polish) and a soft dry cloth to remove fingerprints and polish out light scratches. Abrasive cleaners can scratch the finish and/or remove the shine.

# SCALE & MEASURING

Scale is the relative size of one object to another. ADR drapery rods and related individual components (finials, brackets, and rings) are identified by the Scale of the particular component (1 in., 2 in., 3 in.). This establishes how the various hardware items relate to one another in form, proportion, and function. Be sure to always pay close attention to the dimensions presented for each item. The photos can be deceiving and make some of the 2 in. and 3 in. Scale items appear smaller than the amount of space they actually occupy.

## SIX IMPORTANT MEASURING TIPS

1. Precise measurements are key. Use a steel tape measure and measure to the nearest 1/8".
2. Measure each window individually. Do not assume windows that appear to be the same size are the same size.
3. When determining the exact length of the drapery rod be sure to consider the extra space added by the extension of the finials from the end of the rod.
4. Drapery rod brackets should be installed at least every 4 to 6 feet (depending on the weight of the drapes) and under each point at which rods are joined with a connector.
5. Drapery rings add extra inches to the measurement. This needs to be considered when deciding the height at which the drapery rod is to be installed.

# POLICIES

## ADR PRODUCT POLICY

At ADR, our motto is “We succeed when our customers succeed”. Achieving customer satisfaction and delivering a high-quality customer experience are core values. The company will make every effort within the policies outlined herein to ensure customer satisfaction and build lasting customer relationships. Every order is important to us. Our craftsmen make products to the specifications of our customers. Once an order moves into production, physical and financial resources are committed to fulfilling a specific individual request. These policies enable us to ensure consistency and produce equitable interactions.

## ORDER REVIEW

Please review your order very carefully before it is submitted. It's especially important to be certain that lengths and finishes are correct. It's also important to verify whether merchandise is being sold individually, in pairs, or packaged in other quantities. While our Customer Service Team reviews each order and catches many inconsistencies, it is ultimately up to you to ensure your order is correct.

## ORDER CONFIRMATION

A sales order confirmation email is sent shortly after an order is received. Please review this confirmation promptly and notify ADR at [gcs@artisandraperyrod.com](mailto:gcs@artisandraperyrod.com) if there are any issues.

## PRODUCTION TIME

We manufacture made-to-order products customized according to fabrication selections specified by our clients. Production times can vary depending on the items being made, levels of overall demand, and unforeseen conditions and circumstances affecting the marketplace such as weather and other global/regional events. We strive to ship most orders within 20 business days of the date an order is confirmed (excluding oversized rods, cornices, and custom items). Production and delivery times are not guaranteed so please do not schedule installation until your products have been received, inspected, and accepted. ADR is not responsible for any fees incurred from missed installations or deadlines. ADR always will do its best to communicate about any deviation from its typical production and delivery times. Should there be a significant delay in shipment of your order you will be contacted via email or telephone. Please call or email us with any questions regarding shipping or any order status inquiries.

## CHANGES AND CANCELLATIONS

Orders may be changed or canceled without penalty the same day the order is placed by notifying ADR of the intent to change or cancel the order via an email to [gcs@artisandraperyrod.com](mailto:gcs@artisandraperyrod.com) received before 5 pm Central Time on the day the order is placed.

Orders changed or canceled after 5 pm Central Time the day the order is placed will incur a 25% change order fee as long as notice is provided prior to shipping. Credit is issued to your account and may be applied to subsequent ADR purchases only. Credit is good for one year from the date the email cancellation or change request is received.

Once your order is completed, you will receive an email notifying you that it has either (i) shipped or (ii) is ready for pickup as specified in the order at the time of purchase. You have 30 days from the date you are notified of your order's completion to either return it or request an exchange.

## RETURNS/EXCHANGES POLICY

Returns and exchanges after an order is shipped will incur a 50% restocking fee (shipping charges, if any, are not credited). Once your Returns and Exchange product is received by ADR, a credit is issued to your account and may be applied to subsequent ADR purchases only. Credit is good for one year from the date the returned products are received and accepted. Shipping charges for returned and exchanged merchandise are the customer's responsibility.

To return or exchange eligible merchandise, contact [gcs@artisandraperyrod.com](mailto:gcs@artisandraperyrod.com) and request a Return To Vendor Number (RTV) and return instructions. If you do not obtain an RTV, ADR will be unable to track and process your return or exchange.

ADR does not offer exchanges or refunds on rods over 12 feet in length, bed hardware, cornices, or custom items.

## SHIPPING POLICY

Completed order shipments are processed within two business days following completion of production. Orders are not shipped on weekends or holidays.

Customers choosing to have an order delivered will receive a confirmation email providing notification the order has shipped. The tracking number(s) contained in the email will be active within 24 hours. You also can always contact ADR to inquire about the status of an order. Call (214) 653-1733 or send an email to [gcs@artisandraperyrod.com](mailto:gcs@artisandraperyrod.com).

When the shipment arrives, **PLEASE** inspect the packaging before accepting delivery. If the condition of the packaging causes you to suspect damage may have occurred to the contents in transit, please notify the delivery driver that you are refusing delivery. It will be helpful with damage claims if you (i) notify ADR of the situation and (ii) photograph the packaging and send those photos to ADR at [gcs@artisandraperyrod.com](mailto:gcs@artisandraperyrod.com).

If you accept delivery, please inspect the order for accuracy, completeness, and condition within 48 hours of receipt (must be prior to installation). If there is an issue, please notify ADR immediately by email [gcs@artisandraperyrod.com](mailto:gcs@artisandraperyrod.com), fax (214) 653-1776, or phone (214) 653-1733 and we will determine the best way to resolve the matter.

ADR is not responsible for any fees incurred from missed installations or deadlines.

## NON-TRADE REFUND FEE

ADR sells exclusively to the design trade – interior designers, window treatment professionals and associated trades. We carefully guard this commitment. If an account is created, and an order is placed online, that is deemed to have been made by an individual that is not a valid design trade customer, the order will be canceled (with notice) and charges will be refunded after ADR deducts an administrative fee of 10% of the amount charged when the order was created. If you feel we have made an error in our assessment of your qualifications, please reach out to us at [gcs@artisandraperyrod.com](mailto:gcs@artisandraperyrod.com)
